Subject: Re: REMINDER & MATERIALS: Wyandotte Creek Advisory Committee Meeting, August 5 9am-Noon

Date: August 7, 2021 at 2:14:06 PM PDT

To: Tania Carlone <tcarlone@cbi.org>

Here's that info I mentioned about Enloe's landscaping plan.

Good Afternoon, WAC Members:

Find attend the agenda for tomorrow's (8/5) WAC meeting with links to meeting materials.

Also, see below for Zoom log-in information, which can also be found enclosed on the meeting agenda.

See you tomorrow.

Regards,

Tania

FYI - this tells you about Butte County; Vina kept coming up in the public advisory meeting so I thought you might be interested. Key issues from that advisory meeting: (a) use defined terms - that is, if there is a single goal that applies throughout, call it the "sustainability goal" and work towards that "Sustainability Goal" rather than spelling it out in what ultimately becomes slightly different wording and consequently gives lawyers something to argue about;

(b) work for a minimum standard that is consistent for each and all of the approaches desired. In Butte, the Cal Water people were consistent in asserting that one monitoring well over a 2-year period, should not trigger State interference; BUT they seemed to want 2 wells in a single management area to be necessary sometimes but not other, all of which just leaves arguments open.

(c) be careful what you ask for: in Butte County, they kept looking to minimum/trigger standards based on non-dry years: I am so dense that it was not until a day or so later that I realized that they had avoided the critical issue we face: DRY YEARS. If you actually desire public input, give the public a chance to give you realistic input. This is carefully calculated if you desire true responses. In the case of what Butte provided, it only dealt with 2-consecutive non-dry years and required the public to independently ask "what about dry years, single or consecutive" AND THAT IS AN UNFAIR BURDEN TO PUT UPON THE PUBLIC.

With luck, I have been relatively clear. I am so very grateful that these groundwater management issues are being discussed, vetted, and striving for both beneficial and workable standards. Tasha Levinson (Oroville resident)

If dry years are "built-in", you need to say that each and every time you ask for public comment. We members of the public never will be as clued in to the details as you are so you need to make it easy for us to be involved. again, thank you. Tasha Levinson (Oroville resident)

I do not know that I am at all willing to use/accept your cookies! I do know that the groundwater should be measured by no more than 2 monitoring wells in the Butte sub-basin; and that whether they are in the Oroville or South "management area" should not matter. I also realized that I am concerned by what was not said: your standards look to 2 consecutive non-dry years; WHAT ARE THE STANDARDS FOR DRY YEARS?!!! I so want these standards to work for all of Butte County; citizens need you to help; I should not need to be concerned about what was not included? Thank you so very much for including me in the process. Tasha Levinson (Oroville resident)
