

Wyandotte Creek Subbasin GSP Project and Management Action Submittal Form

This form is available online at: <https://forms.gle/oWP2nr7CJZF1U79E9>

Overview

The purpose of this form is to gather ideas for potential projects and management actions (PMAs) that could be evaluated and ultimately included in the Wyandotte Creek Subbasin Groundwater Sustainability Plan (GSP). Once ideas are gathered, an initial screening and evaluation process will be conducted, followed by ranking of potential PMAs for more detailed evaluation and inclusion in the initial GSP. **Please submit your PMA ideas by April 30, 2021.**

Potential PMAs may fall under several categories, including but not limited to the following:

- Recharge projects
- Supply augmentation projects
- Water conservation projects
- Projects to reduce non-beneficial consumptive use
- Monitoring programs (inter-basin flows, stream-aquifer interactions, groundwater pumping, water levels, etc.)

Criteria for Initial PMA Assessment for prioritization of projects may consider the following:

1. Project addresses one or more of the Undesirable Results or Data Gaps
2. Project is implementable with respect to technical complexity, regulatory complexity, institutional consideration, and public acceptance
3. Project is implementable within the SGMA timeframe
4. Project benefits Underrepresented Communities (URCs) – more emphasis on grants & funding
5. Project has an identified Funding Source
6. Project is located in an area where water quality is suitable for use

PMA ideas may be at various status of development:

Planned Projects	Potential Projects	Conceptual Projects
<ul style="list-style-type: none">•Projects planned to be operational prior to 2042 and the projected supply is considered as offsetting the projected 2042 supply imbalance.	<ul style="list-style-type: none">•Projects in the planning stages and are likely to move forward when funding becomes available.•Potential Projects represent a “menu of options” for the Subbasin to achieve long term sustainability and offset the remaining imbalance above.	<ul style="list-style-type: none">•Projects in the early conceptual planning stages requiring additional work to implement.

Please provide supporting documentation and/or links to that documentation for each question, if available. NOTE: It is recognized that much of the requested information may not be available at this time.

Project or Management Action Name and Contact
